

Installation and Configuration Services

Get Splunk running. Fast.

Are you too busy to fully deploy Splunk across your environment for all of the data sources you need? Do you want to ensure that you are implementing the optimal topology and indexing approach? The Splunk experts on our professional services team are at your service to implement Splunk across your environment.

At the end of the engagement you will have a production Splunk deployment ready for your users to begin searching, navigating, alerting and reporting on your IT data.

What we will do for you

- Inventory data sources, users, retention and management requirements and analyze network topology
- Develop and document a deployment design
- Install Splunk on both dedicated indexing servers, and source hosts across your environment
- Configure indexing for each data source
- Configure data routing and distributed search relationships among Splunk servers
- Set up user accounts or integration with an existing LDAP server
- Validate system performance and efficiency

Benefits

- Ensure that your Splunk deployment follows best practices
- Minimize the time your IT staff spends deploying Splunk
- Accelerate time-to-value

Pricing

A la carte

Installation and configuration services are available a la carte at \$2,000 per day. Contact your Splunk sales representative to arrange for a scoping call today.

Prix-fixe

We also have an Installation and Configuration package available for a \$5,000 fixed price. This package includes:

- Installation and configuration of up to 2 dedicated Splunk servers for indexing and search
- Installation and configuration of up to 3 classes of Splunk servers forwarding data on up to 50 physical servers
- Configuration of up to 5 data inputs on each class of Splunk server, such as a directory, file, network port, database table or scripted input
- Setup of up to 10 user accounts, OR
- Integration with your existing LDAP infrastructure
- Deployment design documentation

Other Services

Along with an installation and configuration engagement, you may also want to consider other services and education offerings to get your Splunk deployment started.

Customization services

Let us create custom reports, searches, alerts, event types and fields in your data for you.

Education

We offer classes on using, administrating, deploying and developing with Splunk.

About Splunk

Splunk is software that indexes, manages and enables you to search logs and IT data from any application, server or network device in real time.
