

Splunk for PCI Compliance Installation and Configuration Services

Splunk helps you meet the PCI mandate.

Do you need PCI reports generated quickly?
Proactively monitor for control violations?
Implement compensating controls? Ensure that
you are covering the right data sources and
information from your card holder servers? These
are just a few of the critical tasks you need to do in
order to meet the PCI mandate.

Splunk can help. Our experts can implement
Splunk for PCI Compliance across your
environment. At the end of the engagement you
will have a production Splunk deployment
collecting the necessary data to report on controls,
monitor control violations, provide compliance
status, and assist in ad-hoc PCI investigations.

What we will do for you

- Inventory data sources relevant to PCI compliance
- Configure relevant data sources and Splunk to centrally collect and store data in support of PCI requirement 10.5
- Configure Splunk with eventtypes and tags referenced by saved searches and reports constituted in the Splunk for PCI Compliance Application
- Configure and schedule delivery for reporting to customer requirements
- Configure and schedule searches and alerts to customer requirements

Benefits

- Ensure that your deployment follows PCI best practices
- Minimize the time your IT staff spends configuring the Splunk for PCI application
- Accelerate time-to-value

Pricing

Splunk for PCI Compliance installation and configuration services are priced according to the license purchased.

5 GB/day package includes
