Suites

This page describes the capabilities included in the various cloud suite offerings listed below as well as what each unit of licensing metric entitles customers to consume in such capabilities.

Observability Cloud

<table>
<tr><th></th><th>Infrastructure</th><th>Application and Infrastructure</th><th>End-to-End</th></tr>
<tr><td rowspan="2">Splunk Observability Cloud Enterprise Edition (service limits per Host)</td><td colspan="3">Splunk Infrastructure Monitoring, Enterprise Edition
20 Containers or Serverless Functions
200 Custom Metrics
50 High Resolution Metrics
Data Retention (1min Roll-Ups / 1sec Native): 13 months / 3 months
Splunk Synthetic Monitoring - Uptime Tests, Enterprise Edition
10k Uptime Test Runs per Month
Splunk Network Explorer
Splunk Log Observer Connect</td></tr>
<tr><td></td><td colspan="2">Splunk Application Performance Monitoring, Enterprise Edition
20 Containers or Serverless Functions
5 Profiled Containers
40 Monitoring MetricSet
400 Troubleshooting MetricSet
20.48 MB TraceVolume ingested per min
10.24 MB Profiling TraceVolume ingested per min</td></tr>
</table>

		Splunk Synthetic Monitoring - API Tests, Enterprise Edition ● 10k API Test Runs per Month	
			Splunk Real User Monitoring, Enterprise Edition ● 10k Sessions/Month ● Session Replay **Splunk Synthetic Monitoring - Browser Tests, Enterprise Edition,** ● 1000 Browser Test Runs per Month (Web or Mobile Browser)

	Infrastructure	Application and Infrastructure	End-to-End
Splunk Observability Cloud Commercial Edition (service limits per Host)	**Splunk Infrastructure Monitoring, Standard Edition** ● 10 Containers or Serverless Functions ● 100 Custom Metrics ● 10 High Resolution Metrics ● Data Retention (1min Roll-Ups / 1sec Native): 13 months / 8 days **Splunk Synthetic Monitoring - Uptime Tests, Standard Edition** ● 10k Uptime Test Runs per Month **Splunk Network Explorer** **Splunk Log Observer Connect**		
		Splunk Application Performance Monitoring, Standard Edition	

		• 10 Containers or Serverless Functions • 3 Profiled Containers • 20 Monitoring MetricSet • 200 Troubleshooting MetricSet • 10.24 MB TraceVolume ingested per min • 5.12 MB Profiling TraceVolume ingested per min **Splunk Synthetic Monitoring - API Tests, Standard Edition** • 10k API Test Runs per Month	
			Splunk Real User Monitoring, Standard Edition • 10k Sessions/Month **Splunk Synthetic Monitoring - Browser Tests, Standard Edition** • 1000 Browser Test Runs per Month (Web or Mobile Browser)

"***Host***" means a virtual machine or physical server with a dedicated operating system up to 64 GB of memory.
Please see Specific Terms for Splunk Observability at www.splunk.com/SpecificTerms for additional definitions.
