

Datadog Replacement Service

Migrate existing observability technologies to the Splunk Observability Cloud

Fast-Track Migration, Amplify Results

Accelerate your migration from Datadog to Splunk Observability with expert guidance, ensuring a smooth transition of business-critical observability use cases. Promote team collaboration on a unified platform to quickly identify and resolve issues, enhancing adoption and maintaining reliability. Expert-led solution replacement workshops accelerate value, improve adoption, and strengthen reliability, all while giving you full control over data and costs.

Improve visibility into ITOps and engineering with shared data, context and workflows for complete digital visibility.

Accelerate time to value with a custom Datadog solution replacement plan tailored to your requirements.

Drive the right outcomes and empower your teams with strategic guidance, services, tools and resources that support your Splunk deployment.

Learn observability best practices and gain critical business and environmental insights from Splunk technical experts.

Expert Services

The Datadog Replacement Service provides expert guidance to help you migrate all components of your existing Datadog monitoring solution into the Splunk Observability Cloud.

Infrastructure Monitoring (IM)	Application Performance Monitoring (APM)	Real User Monitoring (RUM)	Synthetics Monitoring
Achieve complete real-time visibility and alerting for infrastructure and services to reduce mean time to resolution (MTTR).	Achieve early detection of application anomalies with NoSample™ Full-Fidelity trace ingestion to reduce customer impacting service degradations and outages.	Find and fix customer-facing issues across web and mobile with full visibility into the end-user experience.	Proactively find and fix performance issues across user flows, business transactions and APIs to deliver better digital experiences.

Accelerate Solution Transition and Implementation

Supercharge your Splunk Observability adoption and fast-track the move from Datadog by leveraging Splunk best practices, supported by experts who provide technical insights to ensure a seamless switch to a successful Splunk Observability implementation. Activities include:

- Conduct Datadog Replacement Workshop
- Conduct Use Case Workshop to identify business-critical migration components
- Creation of a migration plan based on your environment, use cases and end users to enable a smooth deployment and transition
- Assistance reconfiguring new or existing emitters and metrics pipelines to gather infrastructure and service metrics for Splunk IM
- Assistance instrumenting and updating your application code and code annotations to work with Splunk APM and/or Splunk RUM
- Development of Splunk Synthetic monitoring tests to find, fix and prevent web performance issues from impacting your users and customers
- Recreation of existing business critical visualization and alerting content with custom dashboards, detectors and notification policies
- Assistance with content creation for your end users to assist in their transition from Datadog to Splunk Observability
- Security and governance best practice review and configuration
- Configuration as code support via Terraform
- Advanced Analytics with SignalFlow query language
- Training recommendations and end user workshops
- Platform administration and management checklist

Datadog Replacement Service Overview

Replacement and Use Case Workshops	• Minimize business disruption by migrating critical content seamlessly and avoid costs associated with running multiple observability solutions. Optimize resource allocation by enabling your team to focus on maximizing Splunk's value rather than the complexities of migration.
Tailored Packages	• Our solution replacement packages are sized to suit small businesses through to large enterprises. Modular and expandable, our Datadog Replacement offering can be customized to precisely suit your specific needs.
Level Up Your Team	• With best practice and use case review workshops, training and knowledge transfer sessions. Our consultants will make sure your team is empowered to deliver best in class observability to your business.
