Welcome to Splunk's Supplier Information Portal

- This portal provides information for all suppliers that are conducting business with Splunk via Ariba Network.

- As part of Splunk's ongoing policy to continuously improve efficiency and service quality to suppliers, they are currently implementing the next stage of their overall electronic strategy to move away from paper-based transactions. If during onboarding you have business-related questions, those can be sent to supplier@splunk.com.

- If you have Ariba Network functional questions, complete an SAP Ariba questionnaire by using this link
https://connectsupport.ariba.com/sites/Company?ANID=AN01501035795NAM&h=FmHFn2NWr3Fb3HImvi43sg#Enablement-Inquiry

Splunk Process and Configuration Guides
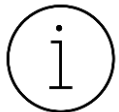

CATALOG

Catalogs are text files stored on Ariba Network (CIF) or on your own website (Punch Out) that describe your products, services, and prices. This allows customers to easily place orders with your company. You can access catalog guides and documentation from the resource list below.

INTEGRATION

Ariba Network offers the possibility to integrate with your back-end ERP system via cXML or EDI, for automatic exchange of electronic documents. You can access integration guides from the resource list below. Integrated suppliers should also reference the Ariba Network Supplier Guide to configure a test account; testing is required for cXML and EDI transactions
