Splunk Speaks Builder

Get the most out of our platform using Splunkbase add-ons and apps. The Builder Tech Talks series shows you how to tackle expanding Security, ITOps, AIOps, and Engineering use cases. You won’t want to miss Splunk’s Builder Tech Talks series of five quick 20-30 minute easy learning webinars.

Top Builder Tech Talks

Improving Dashboard Performance and Resource Usage

Two things affect dashboard performance—the number of searches and the number of visual elements. We’ll show you how to reduce both to optimize power without sacrificing data or chart appeal. Tune in for insightful tips to make your dashboard do what it needs to: search, filter, summarize, and visualize data loads. Dashboard Studio empowers visual optimization and performance capabilities. Add some zip and zazz to multiple graphic panels and elucidate the spotlight on reports, charts, and graphs. Learn best practices for base and chain searches, including bundling and repurposing visuals with a dash of tips to reduce resource-intensive queries and enhance dashboard capabilities.
