

Splunk Observability Value Assessment

Expert Services to achieve maximum value from your Splunk Observability solution, focused on recognizing additional value, and improving adoption through best practices.

Expert Adoption Services

Splunk Observability Value Assessment provides Expert Services to help you realize the value required from Splunk Infrastructure Monitoring and/or Splunk Application Performance Monitoring solution against your business objectives.

During an Observability Value Assessment our Splunk Experts will partner with you and provide guidance on best practices to achieve improved value and insight from your observability use cases.

Use Case Optimization, Configuration Reviews & Recommendations

Have your current Splunk Observability deployment reviewed by Splunk experts providing technical expertise and guidance on how to gain additional value from Splunk Observability leveraging Best Practices.

- Review of current Architecture and Deployment of Splunk Observability products
- Review can include metrics instrumentation, APM instrumentation, chart and dashboard use cases, detectors, outbound integrations and troubleshooting workflows
- Suggestions based on best practices to improve value from current instrumentations, dashboards, detectors and troubleshooting workflows
- Updates on any new platform features and functionals and how they may be used to gain additional insight or improve end user experience
- Executive presentation of findings and recommendations
- Guidance on achieving additional value by using advanced functionality such as built in detector conditions, advanced SignalFlow Analytics or managing content as code via Terraform.
- Identification of additional data sources and use cases to provide additional insights and value
- Recommendations and guidance to onboard additional data sources and implement new use cases while following industry standard best practices.
- Optimization of existing use cases such as excessive noise reduction, misfiring detectors, readability improvements, dashboard optimization and adjusting metadata to make the data you send more useful and meaningful.

Expert Guidance

With experience assisting customers in observability solution deployments across the globe, at customers in different verticals and all sizes, our Splunk Consultants are there to assist and guide you to gain maximum value and insights from your Splunk Observability Solution deployment, following Splunk best practices and providing product and people enablement at every stage of your journey.
