

Improve cyber resilience with AI-powered observability

Strengthen security and resilience by consolidating IT, OT and business data with Splunk. NTT DATA's consulting, managed services and industry expertise deliver real-time observability and AI-driven insights — so you can reduce risk while pursuing innovation.

Data clarity supports resilience and growth

You need faster insights, stronger security and measurable ROI from your technology investments. But fragmented tools and siloed data make it hard to get the clarity needed to innovate with confidence.

We've partnered with Splunk to consolidate IT, operational technology (OT) and business data for real-time observability, AI-driven insights and cyber resilience. This helps you realize value faster, scale securely and adapt quickly across hybrid and multicloud environments.

And because we support you from strategy to operations, your Splunk investments translate directly into outcomes — lower risk, higher efficiency and a stronger competitive edge. Together, NTT DATA and Splunk deliver innovation across key sectors.

Do more with your data insights

Accelerate AI and automation

We apply Splunk to AI-driven use cases, from IT operations and predictive analytics to intelligent automation. By consolidating data streams and applying advanced models, you gain insights faster and reduce manual effort.

Strengthen security and resilience

With expertise in Splunk's Enterprise Security, security orchestration, automation and response (SOAR) and user entity and behavior analytics (UEBA), we can help you design, implement and manage solutions that accelerate threat detection, automate response and reduce risk across hybrid environments. Our model for security operations center (SOC) as a service operationalizes Splunk for continuous monitoring and rapid incident response. We also integrate Splunk with Cisco tools to support zero trust architectures.

Reaching observability at scale

Our consulting and workshops assess readiness for observability, IT service intelligence (ITSI) and AI. We benchmark against industry best practices and help mature processes, people and technology. We monitor and secure SAP environments with tailored Splunk integrations.

Achieving outcomes with industry expertise

We align Splunk capabilities with our industry knowledge to deliver measurable results in sectors such as banking, financial services, healthcare, manufacturing and the public sector. From compliance to innovation, we keep technology investments supporting business-critical priorities.

Simplifying deployment through platform delivery

Our professional services provide tailored installation, setup, onboarding and integration to fit your environments. We make Splunk deployments seamless, scalable and future-ready.

How we deliver

Comprehensive AI Ops and observability

We integrate Splunk with AppDynamics, ThousandEyes and ITSI to give you a clear, comprehensive view of your hybrid and multicloud environments. This approach provides real-time visibility, accelerates AI-driven decision-making and strengthens agility and operational resilience.

Presales technical consulting

We offer complimentary presales technical consulting for established clients, helping shape strategic conversations and speed up adoption. This early engagement reduces time to value, supports enterprise expansion and aligns Splunk deployments with long-term objectives.

Why Splunk and NTT DATA

NTT DATA, Inc. Americas was named Splunk's 2025 Technology Innovation Partner of the Year.

- Accelerate AI and automation by delivering persona-driven insights and tailored AI solutions.
- Achieve end-to-end visibility and security across IT, OT, cloud and edge environments.
- Reduce attacker dwell time and breach costs through proactive threat detection and automated response.
- Achieve proven industry-specific results in BFSI, healthcare, manufacturing and public sector
- Simplify scaling through global delivery, Cisco integrations and managed services.
