

Splunk Enterprise Security Implementation Success

Professional Services

Secure Greater Enterprise Resilience

Jump start your Splunk Enterprise Security (ES) deployment with the Splunk Professional Services ES Implementation Success offering, with access to Splunk resources and expertise to help you quickly ramp up and accelerate your time-to-value while building digital resilience around security use cases.

Benefits of Building a Strong Foundation

Our experts have created this premium offering to support the rapid implementation of Splunk ES in your environment or in Splunk Cloud and designed to increase your overall return on investment (ROI). Your organization will benefit from the vast experience of our team, who deploys and works with Splunk every day, and the best practices we have established that ensure ES is quickly optimized for your unique environment.

What We'll Do and Deliver

Planning

- Workshop with a Solutions Architect to develop a plan for implementation
- A Delivery Manager assists with coordination and tracks your path to success

Installation

- Install and deploy Splunk Enterprise in your environment
- On-board seven or nine essential data sources
- Deploy & optimize 7 to 18+ use cases (correlation searches)
- Optimize out-of-the-box content

Knowledge Transfer and Preparation

- Provide remote over-the-shoulder knowledge transfer and Splunk Admin onboarding and enablement
- Complete a walk-through of ES functionality for your staff
- Review best practices for on-boarding data
- Review best practices for creating correlation searches

Guidance at Every Step of Your Splunk Journey

Splunk has developed a wide range of Service offerings to be responsive to dynamic challenges, requirements, and urgent needs. As your organization is focused on achieving accelerated time-to-value, as well as the need to optimize workflows, you may need help to maximize your use of Splunk in driving enterprise resilience for better outcomes.

At a Glance

The Splunk Enterprise Security Implementation Success offering is for anyone who is interested in implementing or replacing their existing Security Event and Incident Management (SIEM). It is a best fit for those who have a dedicated security operations team.

Three sizes to meet your needs

Basic

Customers with dedicated, internal Splunk resources to self-implement and simply need deployment guidance and best practices.

Standard

Customers looking for more dedicated, hands-on deployment assistance during initial rollout of first use case.

Premium

Organizations fully invested in Splunk, focused on identifying new opportunities for optimization and expansion, plus staff augmentation to deploy additional use cases.
