

Splunk Education Basic Subscription

A one-year package of self-paced learning to enable your organization to use Splunk

The Value of Splunk Education

When organizations use Splunk to remove the barriers between data and action, the possibilities are endless – especially if you have experts trained and educated to administer, operationalize, and analyze Splunk.

Using the easily-accessible courses and training from Splunk Education, organizations gain the knowledge and skills needed to more quickly integrate the Splunk platform and use its power and insights to increase security, drive resilience, and innovate.

A One-Year Package of Possibilities

The Splunk Basic Subscription is a one-year package of almost two dozen self-paced, lab-supported courses designed to train anyone in your organization to become Search Experts and Knowledge Managers – skills that are critical to getting the most value from your Splunk investment.

Self-Paced, Flexible eLearning

The Splunk Basic Subscription courses provide learners with unlimited flexibility – allowing them to access and complete training anytime, anywhere immediately upon registration. There is no limit to the number of learners who can register from your organization as long as they register only once for each course and complete the training within one-year of registering.

Videos, Labs, and Certificates

This model offers unlimited video replays for one year following registration, 4-hour access to the lab environment three times per course (if labs are included), and course completion certificates.

Start with the Basics

With this subscription model, learners get started with our basic courses:

- Intro to Splunk
- Using Fields

Follow One or Both Learning Paths

After getting trained on the basics, learners can then follow **one or both** of these learning paths.

Search Expert - This path offers courses about creating advanced searches, performing forensics, providing search-related support, and more.

- Visualizations
- Working with Time
- Statistical Processing
- Comparing Values
- Result Modification
- Scheduling Reports and Alerts
- Introduction to Dashboards
- Search Under the Hood
- Leveraging Lookups and Subsearches
- Correlation Analysis
- Dynamic Dashboards
- Creating Maps
- Multivalue Fields
- Search Optimization

Knowledge Manager - This path offers courses about creating and managing knowledge objects to interpret, classify, and enrich data, build and accelerate data models, and more.

- Intro to Knowledge Objects
- Creating Knowledge Objects
- Creating Field Extractions
- Enriching Data with Lookups
- Data Models

There's no easier, more efficient way to get your organization up-skilled in using Splunk. Please contact [Splunk Education](#) for pricing and more detailed information.
