FedRAMP Up With Splunk
Drive Confident Decisions and Actions With Splunk

Cloud Services Offer Game-Changing Benefits to Government Agencies, Including:
- Improved delivery of IT services
- Reduced cost of powering and managing IT services
- Enhanced security posture
- Improved security operations and systems
- Improved visibility on cloud resources
- Weighted feedback on assurance

Yet only 13 out of 156 IT decision-makers surveyed that were within the public sector are confident in their ability to modernize current systems and applications, including cloud/hybrid migrations.

According to a study of over 16,000 IT and security practitioners, migrating to the cloud is challenging due to the:
- Inability to achieve a strong security posture.
- Complexity in migrating from on-prem to cloud.
- Lack of visibility into resource utilization, metering and monitoring.

FedRAMP-authorized cloud services help government agencies securely accelerate their cloud migration and modernization efforts.

From June 2017 to July 2019, the number of agencies using FedRAMP authorizations increased from 390 to 926.

21 out of 24 agencies reported that FedRAMP made their data in cloud environments more secure or about the same.

21 out of 24 agencies reported that FedRAMP authorizations reduced costs in reviewing CSP assessment and authorization packages.

Splunk Cloud is the first FedRAMP-authorized data analytics and security analytics cloud service.

Splunk Cloud delivers security out-of-the-box and is built to achieve increased agility with low administrative overhead.

FedRAMP Cloud adheres to one of the most rigorous security and compliance standards.

Little-to-no infrastructure costs — reduce the physical burden of maintaining servers and infrastructure-on-prem.

Accelerate time-to-value by going live from an on-prem solution in as fast as two days with 100% availability.

End-to-end real-time analysis and monitoring to help manage complexity.

Collect and correlate data from any source regardless of format and scale, for full visibility and rapid insights.
