FedRAMP Up With Splunk Cloud
Drive Confident Decisions and Actions With Splunk

Cloud Services Offer Game-Changing Benefits to Government Agencies, Including:
- Improved delivery of IT services
- Improved customer experience
- Reduced cost of provisioning IT services
- Increased data security and mission assurance experience
- Strengthened mission assurance
- Enhanced customer experience
- Improved delivery of IT services
- Reduced cost of provisioning IT services

Yet only 137 of 156 IT decision-makers who were surveyed within the public sector are confident in their ability to modernize current systems and applications, including cloud/hybrid migrations.

According to a study of over 16,000 IT and security practitioners, migrating to the cloud is challenging due to:
- Inability to achieve a strong security posture.
- Complexity in migrating from on-prem to cloud.
- Lack of visibility into resource utilization, metering and monitoring.

From June 2017 to July 2019, the number of agencies using FedRAMP authorizations increased from 390 to 926.

FedRAMP-authorized cloud services help government agencies securely accelerate their cloud migration and modernization efforts.

FedRAMP and Cloud Services Offer Game-Changing Benefits to Government Agencies, Including:
- Increased data security and mission assurance experience
- Strengthened mission assurance
- Improved delivery of IT services
- Reduced cost of provisioning IT services

Splunk Cloud is the first FedRAMP-authorized data analytics and security analytics cloud service.

Splunk Cloud offers one of the fastest ways to leverage your data to solve operational complexity and securely enable modernization.

Little-to-no infrastructure costs – reduce the physical burden of managing servers and infrastructure on-site.

Accelerate time-to-value by going live in as fast as two days with 100% availability.

Managed by Splunk experts, so your team can focus on doing higher-value business.

Scalable architecture – seamlessly accommodate sudden or unexpected spikes in data volume.

Operate Splunk Premium solutions — including ITSI and Enterprise Security — at the highest-level of maturity and availability.

Beyond FedRAMP, Splunk Cloud adheres to one of the most rigorous security and compliance standards.

Splunk Cloud delivers security out-of-the-box and is built to achieve increased agility with low administrative overhead.
