### DevOps Data

- **Plan**
- **Code**
- **Build**
- **Test/QA**
- **Stage**
- **Release**
- **Monitor**

### Stage 1: Get Machine Data

### Stage 2: Increase Software Delivery Velocity

Using Machine Data...
- Deliver Visibility across the build pipeline
- Iterate Faster with correlated insights
- Improve Efficiency by measuring release contributions

Resolve code issues before they impact customers!
Find and fix production issues faster!
Use metrics to ensure code meets SLAs!

### Stage 3: Improve Code Quality

#### 46x More Frequent Deployments

#### 96x Mean Time to Resolution Faster

#### 22% Less Time on Unplanned Work
