

Where Are You on the Road to Operational Intelligence?

Can your business make split-second decisions based on what's happening across your IT infrastructure and applications? Your IT infrastructure is holding untold insights.

Search and Investigate

- Search massive volumes of machine data in real time
- Reduce mean time-to-resolution

eTravel uses Splunk to identify incidents and determine the cause in <30 minutes

Proactive Monitoring

- Improve uptime and availability by correlating events and automatically detecting patterns across massive data sets
- Identify issues, problems and attacks before they impact customers and sales

Middlesex Hospital uses Splunk to turn IT resolution time from hours or days to minutes or seconds

Operational Visibility

- Gain end-to-end visibility across the organization
- IT services are managed holistically, not as disconnected silos

Using Splunk to correlate system performance with security data enables Autodesk to isolate and resolve security issues up to 80 percent faster

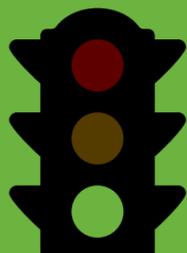

Business Insights

- Optimize business operations with real-time insight
- Understand trends and patterns across machine data

Domino's Pizza uses Splunk to monitor e-commerce sales and entice customers with coupons on-the-fly

Reap the Rewards of the Journey

Put Operational Intelligence in high gear.
