Do you want to get more value from your data? Splunk Enterprise collects data from any source, including metrics, logs, clickstreams, sensors, stream network traffic, web servers, custom applications, hypervisors, containers, social media and cloud services. It then enables you to search, monitor and analyze that data to discover powerful insights across multiple use cases like security, IT operations, application delivery, industrial data and IoT, giving you valuable intelligence across your entire organization.

With Splunk Enterprise, everyone from data or security analysts to business users can gain insights to drive operational performance and business results. Whether you’re looking to troubleshoot IT, monitor your security posture or optimize marketing campaigns, Splunk Enterprise can help get you there.

**Operational Intelligence. Any Industry. Any Use Case.**

Across the enterprise, there is untapped value in the machine data generated by your business infrastructure and applications. Hidden in this data is the Operational Intelligence you need to run your business, optimize your operations and generate revenue. From healthcare to manufacturing and financial services to public sector, Splunk Enterprise is the leading platform for Operational Intelligence. Whatever your business challenge, just point your data at Splunk Enterprise and start analyzing your world.
Collect and Index Data
Collect machine data from virtually any source and location. Use Splunk’s schema-on-read technology to freely analyze and correlate data without the limitations of conventional database structures. Import data from relational databases and data warehouses for a complete business view.

Search, Analyze and Visualize
The powerful search language supports all of your search needs—from the simplest to the most sophisticated. Point-and-click analysis brings insights to business users. Rich visualizations then make results understandable and actionable for all audiences.

Monitor, Alert and Report
Get proactive. Set thresholds to monitor for incidents or proactively signal potential issues. Use alerts to launch applications or custom actions. Interact with your data with custom dashboards that can be shared or embedded into other applications as PDFs.

Apps and Premium Solutions
Extend the power of Splunk Enterprise. Apps deliver a targeted user experience for typical use cases and data sources. Splunk Premium Solutions combine real-time analytics and rich features to manage your security posture, IT operations and more.

An Enterprise-Grade Analytics Platform: Performance, Scale and Management
Splunk Enterprise scales to hundreds of terabytes per day to meet the needs of any organization, and supports clustering, high availability and disaster recovery configurations. All of this—while keeping your data secure with role-based access controls, secure data handling, auditability and assurance of data integrity.

You can deploy Splunk Enterprise on-premises or in the cloud, use it as a SaaS service via Splunk Cloud, or in any combination you like. You will always have a unified view of your data regardless your deployment.

Download Splunk Enterprise for free. Or sign up for Splunk Cloud, which delivers Splunk Enterprise as a service.
