SPLUNK® TV
View, access and manage Splunk dashboards on Apple, Android, or Fire TVs

- **Keep your team on the same page.** Enable your team to easily see and monitor what’s going on within your business.
- **Customize your TV experience.** Provide a variety of ways to present your dashboards, such as slideshows or split screens.
- **Manage your TVs with ease.** Seamlessly set up and centrally manage multiple TVs and dashboards at scale.

Splunk TV enables your business to easily visualize your data on the big screen, whether these dashboards are created with Simple XML, Dashboard Studio, or ITSI Glass Tables. The large, rich visualizations make it simple for your team to quickly analyze any situation using a single or set of dashboards. Deploying Splunk TV and securely managing this data has never been easier. Admins can easily connect TVs to Splunk Secure Gateway and begin using Splunk TV in a few clicks.

What can Splunk TV do for you?

- **Reduce costs** by eliminating the need for multiple connected computers and instead leverage cost-effective Apple, Android, or Fire TVs.
- **Guard against data manipulation** by displaying read-only data, preventing access to your instance and unwanted edits with keyboards and mice.
- **Improve team collaboration** and support rapidly-changing environments with the ability to remotely deploy dashboards to multiple TVs.

**Native Visualizations**

Large visualizations, natively built for the television screen, make it simple to track and understand important data. TV dashboards seamlessly integrate with your Splunk instance, so getting started is effortless.

**Slideshow**

Create a slideshow of dashboards in just a few taps. Slideshows can cascade multiple visualizations at once so it’s easy for you to display and manage sets of related dashboards.

**Splunk TV Companion**

Splunk TV Companion lets you to easily control multiple TVs through a single interface. Save a dashboard layout on multiple TVs as a shortcut to quickly switch content when responding to alerts, or split a single dashboard across a grid of TVs. Whether you have several TVs in a single location or are remotely managing a group of TVs across the globe, use Splunk TV to coordinate your workforce around important events from a central location and rapidly bring dashboards to the attention of those who need it.
