

Breach Response Support

Need experts to support the hunt? We have them.

- Onboarding new data sources to support your immediate hunting needs
- Searching and investigating in Splunk
- Available to increase capacity in your Splunk security environment when you need it most
- Help with long-term investigation, beyond the initial response

Even if you have a mature security posture, malicious actors can take advantage of unforeseen vulnerabilities in your network, including your users, devices and software. When you discover your network has been exploited, the most important thing you can do is respond as quickly as possible to determine the extent of the incident and re-establish the integrity of your network.

Splunk Professional Services are available to support your internal team or an incident response company by augmenting your staff with Splunk's experts to increase your hunting capacity. The Splunk Professional Services team lives and breathes SPL (Splunk Programming Language), which means we can quickly support you in developing the queries you need to investigate your event.

Not sure whether the data you need is already in Splunk? Don't worry, our team is full of experts at onboarding data. We can help you determine what information is the most critical to support your investigation.

Even if you are already a mature Splunk SOC and have a well-trained team, sometimes you just need more experts to tackle the event. Splunk has you covered here, too. Let us sit with your experts and increase your capacity until you are ready to go back to normal operations.

From Limited Support to Breach Response

Splunk is not an incident response company, but we make the world's leading SIEM software, used by some of the best incident response teams in the business. We want our customers to know we are invested in their security and are standing by to support their needs wherever we can.

During a security event, we recommend you bring in the right incident response team to lead your remediation. Splunk Professional Services are available to support your needs with rapid-data onboarding, Splunk environment upgrades, expert search and investigation and staff augmentation.

For immediate support, contact your account representative.

Free Online Sandbox. Get access to a free, personal environment provisioned in the cloud where you can immediately try and experience the power of Splunk IT Service Intelligence. After the initial trial period, or any time before then, you can convert to an Enterprise license by [contacting sales](#).
