

Splunk IT Service Intelligence

Service Mapping Offering

The Splunk ITSI Service Mapping Workshops offering provides analysis and design services to define the components needed to properly configure ITSI to achieve your objectives. This offering is designed to be a comprehensive requirements-gathering session which will define the services and associated Key Performance Indicators (KPIs) that you wish to manage in your environment. It includes a discovery session, data validation, service review, entity definition, addition of KPIs and associated thresholds and finally, blueprinting of glass tables to monitor your environment.

Drive your Success and Accelerate Your ITSI Project

These services are backed by Splunk experts, ensuring consistent and quality delivery, architecture, training and ongoing sustainment for Splunk in your enterprise.

Business Challenge

IT organizations today are challenged to sift through the mountains of data at speed and scale, to manage their business and help drive innovation. This requires a shift in focus from day-to-day operation of technology to a focus on leveraging the technology to enable desired business outcomes. You need support from your key technology partners, with a deep understanding of your business objectives, to ensure that your critical initiatives quickly and measurably deliver the highest possible return on investment.

Splunk Solution

The ITSI Service Mapping offering is designed to drive your realization and accelerate return on investment and business value. The ITSI Service Mapping offering partners with you to understand your business goals, jointly develops the list of Services offered by your organizations and together create a plan to realize the value of implementing those Services into ITSI.

Offer Details

- Comprehensive Requirements Gathering Session:** Session designed to collect and document high level KPIs and associated Glass Tables in order to create a visual representation of key services you provide.
- Business Service Identification:** Splunk will work the customer and responsible stakeholders to identify, collect, prioritize and document detailed business services, associated requirements, process workflows and associated KPIs.
- Service Decomposition Example:** Review the service decomposition approach and select an identified business service to quickly and effectively monitor; including KPIs, and data sources.
- Data Validation:** This step validates that the data required to measure your associated KPI's in Splunk, or we have a detailed plan of how to obtain this data.
- Implementation Roadmap:** Splunk Professional Services will work with you to determine the optimal approach for your IT Service Intelligence requirements.
- Executive Presentation – Next Steps:** Splunk provides an executive presentation to outline our findings, rationalize our recommendations and illustrate a sequence of initiatives for customers to execute in order to quickly adopt Service Intelligence in your organization.
- Reference documentation:** All relevant information and documentation will be made available to you after the implementation is complete.
- Project Oversight:** Designed to achieve project objectives through a set of activities that start and end at certain points in time and produce quantifiable deliverables.
- Duration:** 2 week

Target Customer Attributes

The Splunk Professional Services ITSI Service Mapping offering is designed for customers with the following attributes:

- Customers wanting to implement a service centric data driven monitoring approach
- Customers who have already on-boarded operational data sources
- Customers who want to gain more insight into their operations without building custom dashboards

Splunk Professional Services

Our services are backed by Splunk Accredited Consultants, Solutions Architects, and Delivery Managers. They leverage Splunk best practices and experience from thousands of Splunk deployments.

We only exist to get customers to valuable outcomes with their machine data – faster than they could on their own.
