

Splunk Certified Architect Track

This certification track prepares Splunk partners and customers to become Splunk Certified Admins. In addition to attending the listed classes that include lecture and hands-on labs, participants take part in two online tests.

Courses for Architect Certification

Splunk Fundamentals 1

This course teaches you how to search and navigate in Splunk to create reports and dashboards, both using Splunk's searching and reporting commands and using the product's interactive Pivot tool. Scenario-based examples and hands-on challenges will enable you to create robust searches, reports, and charts.

Splunk Fundamentals 2

Scenario-based examples and hands-on challenges coach you step-by-step through the creation of complex searches, reports, and charts. Major topics include using transforming commands and visualizations, filtering and formatting results, correlating events, creating knowledge objects, using field aliases and calculated fields, creating tags and event types, using macros, creating workflow actions and data models, and normalizing data with the Common Interface Model (CIM).

Splunk Enterprise System Administration

This 2 virtual day course is designed for system administrators who are responsible for managing the Splunk Enterprise environment. The course provides the fundamental knowledge of Splunk license manager, indexers and search heads. It covers configuration, management, and monitoring core Splunk Enterprise components.

Splunk Enterprise Data Administration

This 3 virtual day course is designed for system administrators who are responsible for getting data into Splunk Indexers. The course provides the fundamental knowledge of Splunk forwarders and methods to get remote data into Splunk indexers. It covers installation, configuration, management, monitoring, and troubleshooting of Splunk forwarders and Splunk Deployment Server components.

Architecting Splunk Enterprise Deployments

This nine-hour course focuses on large enterprise deployments. Students will learn steps and best practices for planning, data collection and sizing for a distributed deployment. Workshop-style labs challenge students to make design decisions about an example enterprise deployment.

Splunk Architect Certification Lab

This 24-hour practical exam is designed to assess the skills and knowledge of Splunk Certified Architect candidates and is the final step toward certification. Each participant is given access to a specified number of Linux servers and a set of requirements. Participants then perform a mock deployment according to requirements which adhere to Splunk Deployment Methodology and best-practices.

About Splunk

Splunk is software that indexes, manages and enables you to search data from any application, server or network device in real time.
