

Splunk Education Learning Path for Cloud Customers

Splunk Education programs help you get the most out of Splunk. The curriculum is comprised of lecture, demos, hands-on lab exercises and assessments to test your knowledge. Courses are concise and designed for Splunk users, administrators, developers, architects and partners and are structured for rapid learning. We offer a variety of delivery methods including instructor-led virtual and onsite training as well as self-paced training that provides flexibility to attend at anytime from anywhere. Whether you just downloaded Splunk or have been using it for years, Splunk Education courses deliver value and accelerate success.

Splunk Cloud Customers

Splunk Education's learning path for Splunk Cloud customers offers courses for end users as well those in charge of managing Splunk Cloud users, data inputs, and configurations.

Splunk Fundamentals 1

This self-paced course teaches you how to search and navigate in Splunk, use fields, get statistics from your data, create reports, dashboards, lookups, and alerts. It will also introduce you to Splunk's datasets features and Pivot interface.

Splunk Fundamentals 2

This course focuses on additional SPL commands, using field aliases and calculated fields, creating tags and event types, using macros, creating workflow actions and data models, and normalizing data with the CIM.

Creating Dashboards with Splunk

This course is designed for power users who want to learn best practices for building dashboards and forms. It focuses on improving performance, using tokens and global searches; customizing charts, creating dynamic behaviors and adding extensions for JavaScript and CSS.

Splunk Fundamentals 3

This course focuses on additional search commands as well as on advanced use of knowledge objects. Major topics include advanced statistics and eval commands, advanced lookup topics, advanced alert actions, using regex and erex to extract fields, using spath to work with self-referencing data, creating nested macros and macros with event types, and accelerating reports and data models.

Advanced Searching and Reporting with Splunk

This course takes the Splunk search language to the next level. Learn powerful advanced commands and lookup methods.

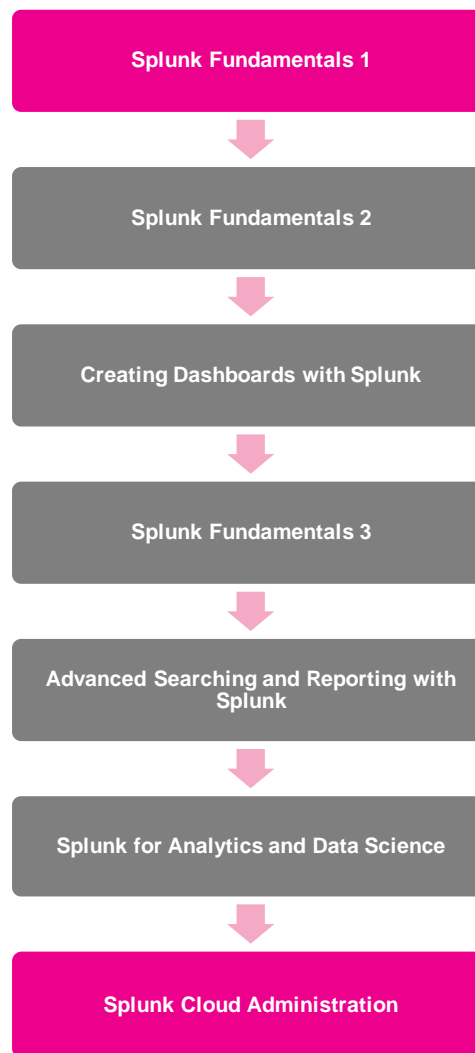

Splunk for Analytics and Data Science

This course, covers implementing analytics and data science projects using Splunk's statistics, machine learning, built-in and custom visualization capabilities.

Splunk Cloud Administration

This course prepares administrators to manage users and get data in to Splunk Cloud. Topics include data inputs and

forwarder configuration, data management, user accounts, and basic monitoring.
