

Splunk Education Learning Path for Enterprise Security End-Users

Splunk Education programs help you get the most out of Splunk. The curriculum is comprised of lecture, demos, hands-on lab exercises and assessments to test your knowledge. Courses are concise and designed for Splunk users, administrators, developers, architects and partners and are structured for rapid learning. We offer a variety of delivery methods including instructor-led virtual and onsite training as well as self-paced training that provides flexibility to attend at anytime from anywhere. Whether you just downloaded Splunk or have been using it for years, Splunk Education courses deliver value and accelerate success.

Splunk Enterprise Security End-Users

This path prepares security practitioners to use Splunk Enterprise Security (ES). Students will use ES to identify and track security incidents, analyze security risks, use predictive analytics, and threat discovery.

Splunk Fundamentals 1

This self-paced course teaches you how to search and navigate in Splunk, use fields, get statistics from your data, create reports, dashboards, lookups, and alerts. It will also introduce you to Splunk's datasets features and Pivot interface.

Splunk Fundamentals 2

This course focuses on additional SPL commands, using field aliases and calculated fields, creating tags and event types, using macros, creating workflow actions and data models, and normalizing data with the CIM.

Creating Dashboards with Splunk

This course is designed for power users who want to create fast and efficient views that include customized charts, drilldowns, advanced behaviors and visualizations. Major topics include using tokens, global searches, event handlers, dynamic drilldowns and simple XML extensions for JavaScript and CSS.

Splunk Fundamentals 3

This course focuses on additional search commands as well as on advanced use of knowledge objects. Major topics include advanced statistics and eval commands, advanced lookup topics, advanced alert actions, using regex and erex to extract fields, using spath to work with self-referencing data, creating nested macros and macros with event types, and accelerating reports and data models.

Advanced Searching and Reporting with Splunk

This course takes the Splunk search language to the next level. Learn powerful advanced commands and lookup methods.

Using Splunk Enterprise Security

This course prepares security practitioners to use Splunk Enterprise Security (ES). Students will use ES to identify and track security incidents, analyze security risks, use predictive analytics, and threat discovery.
