

Splunk Architect Certification Lab

This 24-hour practical exam is designed to assess the skills and knowledge of Splunk Certified Architect candidates and is the final step toward certification. Each participant is given access to a specified number of Linux servers and a set of requirements. Participants then perform a mock deployment according to requirements which adhere to Splunk Deployment Methodology and best-practices.

Lab Format

The lab is facilitated by a live instructor via virtual classroom. Participants are allowed 24 hours continuous access to the servers to complete the requirements. A live instructor is available for the first 4 hours for direct facilitation.

Course Prerequisites

- Using Splunk
- Searching and Reporting with Splunk
- Creating Splunk Knowledge Objects
- Splunk Administration
- Advanced Dashboards and Visualizations
- Architecting and Deploying Splunk

**** 30 days hands-on Splunk experience following completion of above courses is recommend prior to attending the Certification Lab.**

Course Modules

Installation and Infrastructure

- Install a search head, deployment server and indexers
- Perform a scripted installation of universal forwarders

Configuration, Collection, and Comprehension

- Deploy all specified configurations via deployment server
- Gather data from forwarders and send to multiple indexes depending on use case
- Configure and confirm index-time knowledge
- Create search time field extractions

Searching and Reporting

- Create searches and dashboards for each required use case

About Splunk Education

Splunk classes are designed for specific roles such as Splunk Administrator, Developer, User, Knowledge Manager, or Architect.

Certification Tracks

Our certification tracks provide comprehensive education for Splunk customer and partner personnel according to their areas of responsibility.
